Hosted by: Nebraska Association For the Gifted

Classroom Application for High Ability, Regular Ed, Special Needs, All Grades, All Disciplines, All the Time !!

A one day conference for educators who work with and support high ability students in the regular classroom. The team of neurotranslators will provide participants the newest instructional brain based research while giving practical classroom application.

"Brain Boot Camp: Research That Guides Best Practice In The Classroom"

Research and Classroom Application by Dr. Ron Bonnstetter, UNL Science Educator, Neurotranslator

•Practitoner's Tool Box: Dr. Bonnstetter and the "UNL Neuro-translators" will continue to add to the practitioners tool box with brain research that supports the needs of all students in regular education classrooms with an emphasis on high ability students in your school. Their work includes research that targets education reform by examining not just best practices, but the actual biology of learning. The field of neurology informed teaching is improving practice in many exciting ways. The "UNL Neuro-translators" include Lincoln Science Coordinator, Kirsten Smith, Cindy Larson-Miller, former middle school teacher and present School of Natural resources Masters Coordinator, and Sara Yendra, former high school teacher and present UNL Environmental Studies advisor. Mark your calendar and plan to attend this neuron-stimulating workshop!!
